Summary

I am a Front-End Developer with 1 year of experience, specializing in technologies like ReactJS and Shopify platform. I am passionate about creating responsive and dynamic user interfaces, delivering technical solutions. In my free time, I continuously learn and apply new technologies to enhance my technical skills.

Technical Skills

Confident working with:

- **Front-End:**
 - HTML5, CSS3, Javascript (ES6+), Typescript
 - ReactJS
 - Tailwind CSS
 - UI library: ShadcnUI
 - State management: Redux, Zustand
 - Build tools: Vite
 - Liquid (Shopify)
- **Tools:** Git, Figma, Postman, Shopify
- **Other Skills:**
 - Effective verbal and written communication in English (APTIS Level B2).
 - Strong teamwork skills with experience in Agile methodology, using Jira for task management and sprint planning.

Work Experience

Meowcart Ecommerce - Junior Frontend Developer (04/2024 - 02/2025)

- Worked on Shopify projects like Crocs, FitFlop, Babeeni, SEESON, Bupbes, LiiLash,...
- Fix bugs, optimized performance and improve user interfaces for Shopify stores.
- Worked closely with the Back-End team to integrate APIs.
- Directly received client requirements to develop new features and support the integration of third-party services and platforms.
- Projects:
 - **Crocs Loyalty:**
 - Role: Front-End Developer
 - Description: Integrate loyalty features for Crocs stores.
 - Tech Stack: HTML, CSS, Javascript, Liquid
 - Responsibilities:
 - Implement interface development, API connection, responsible for project stability and maintenance.
 - Identified and fixed legacy issues affecting the Crocs website.
 - **Meow-Login:**
 - Role: Full-Stack Developer
 - Description: This application is used to configure user's Shopify store with the additional feature of registering an account via phone number, and authenticating via OTP code.
 - Tech Stack: ReactJS, NestJS, Liquid, Firebase Function.
 - Responsibilities: Collaborated with team members to develop the UI and backend of the Meow-Login app.

Projects

Product Comparision:

This is the final project for the course name '.NET Technology' at university, which I do all task on Front-end. This website based on **VERSUS**, which compare between two products with the same category. Developed a clean and modern website using ReactJS, TailwindCSS. Utilize responsive design. Some special functions in this project:

- Implemented an admin dashboard for managing product displays on the website.
- Developed a feature to compare detailed specifications between multiple products.

E-commerce Website:

This project develop admin dashboard and client homepage. In admin side, user can manage product and everything that show to web page. In client side, this web page show an e-commerce site. Developed using NextJS, Typescript, PrismaDB and ShadcnUI as UI library.

Some special functions in my project:

- CRUD product in admin page.
- User-friendly interface.
- In client-side is a perfect web e-commerce, with fully functions (add to cart, support payment by bank card, implement with Stripe).
